

OneLaw V4.2.4 is a small but valuable release. It includes the exciting introduction of our new integration with phone provider VXT, as well as a couple of functional improvements and fixes. Use the notes and resources below to get the most from OneLaw V4.2.4. To organise your update, please contact [support@onelaw.co.nz](mailto:support@onelaw.co.nz) with some suitable update dates/times.

Each note includes the functional area, a brief then a more detailed summary of the development. View the resources below to get familiar with the new VXT integration. Please note, to enable this integration you'll need to arrange licencing directly with VXT and then contact our support team to begin the setup process.

### NEW FEATURE (CLOUD FIRMS ONLY)

FUNCTIONAL AREA	BRIEF	SUMMARY
Integrations	New <b>integration with VXT</b> (phone provider) to streamline file note taking and time recording for phone calls.	<p>For our cloud customers, we're excited to launch our integration with VXT. This integration will allow firms to sync parties and contact information, record and transcribe calls as needed and seamlessly record time and manage file notes directly to OneLaw.</p> <p>NOTE: Once you have set up licencing directly with VXT, the integration then needs to be enabled by our support team. The remainder of the setup, both from the OneLaw and VXT end, can be completed by you. View the resources above for details. Learn more about VXT <a href="#">here</a>.</p>

### FUNCTIONAL IMPROVEMENTS & FIXES

FUNCTIONAL AREA	BRIEF	SUMMARY
Statements	Improvements to <b>statements</b> .	<p>We have made the following changes to our settlement statement based on feedback from our V4.2.3 release:</p> <ul style="list-style-type: none"><li>+ Added the Whangārei District Council to the calculators</li><li>+ Changed the Hutt City Council rates from 6 instalments to 4</li><li>+ Changed the Carterton District Council rates from 3 instalments to 4</li></ul>
Integrations	Fixed issues with the <b>APLYiD integration</b> .	<p>We have fixed the following issues with the APLYiD integration:</p> <ul style="list-style-type: none"><li>+ Some eIDV requests started from multi parties were being incorrectly marked as complete when populated in the eIDV (electronic identity verification) dashboard</li><li>+ Where requests were set to a "review" status, some details could have been incorrectly verified</li></ul> <p>NOTE: To use the this integration, you must be on our cloud platform and have a licence set up directly with APLYiD. Learn more about APLYiD <a href="#">here</a>.</p>
