

## Code Signing Changes for OneLaw 4.3.0

### Overview

OneLaw 4.3.0 includes the addition of a new signed library, **Humanizer.dll**. This file is digitally signed to ensure authenticity and code integrity.

### Who is this for?

This information is **only required** for customers who enforce strict application control policies (such as AppLocker, WDAC, or other certificate-based whitelisting tools). If your environment does not restrict software execution based on digital signatures, no action is required.

### Certificate Details

To ensure uninterrupted service for users, please add the following certificate details to your existing "Allow" lists if necessary:

```
"SerialNumber": "0E47146E05B87BDA9A8E39C05EB0D603",  
"Name": "Humanizer (.NET Foundation)",  
"Files": [  
  "\\Humanizer.dll"  
],  
"Subject": "CN=Humanizer (.NET Foundation), O=Humanizer (.NET Foundation),  
L=Redmond, S=wa, C=US, SERIALNUMBER=603 389 068",  
"Issuer": "CN=.NET Foundation Projects Code Signing CA, O=.NET Foundation,  
C=US",  
"Thumbprint": "CD737C5B6A9E0E058E69B7CBC4DD36EAEAA63475"
```
